

SSN Confirm

Automated SSN verification directly through the SSA

SSN Confirm from CoreLogic® gives you direct, reliable access to the Social Security Administration (SSA) for exact verification of your applicant's name and Social Security Number (SSN). SSN Confirm saves you time by delivering real-time accurate verification results, while helping you meet fraud and compliance requirements quickly and conveniently.

Reliable, fast verification

Unlike other SSN verification providers, SSN Confirm is an online solution that lets you verify applicant SSN data in minutes.

- Applicant Name
- Social Security Number
- Date of Birth

Simple to use

Using our online portal, simply upload your signed and dated consent form (Form SSA-89), then key in the corresponding applicant information in the data fields available and click "submit". The SSA will analyze the SSN data they have on file and will verify in minutes whether or not the information you provided matches, does not match or the SSN is marked as deceased. SSN Confirm is also available in batch format for convenient processing of multiple reports.

Product Highlights

- Verify SSN data directly through the Social Security Administration office
- Delivers accurate verification of SSN data
- Automated process provides results in minutes
- Supports eSignature functionality through the SSA's eCBSV program
